

Padua, Italy 23/11/20

STATEMENT ON CHEMICALS, REGULATIONS AND STANDARDS

In the Italtronic Products are not used or intentionally add any of the chemicals restricted by **Regulation (EU) 2019/1021 on persistent organic pollutants (POPs)** and its subsequent amendments.

However, our products are not tested to check any possible presence of the substances mentioned above since this testing process is not a standard procedure within Italtronic srl, therefore the presence of trace amounts in the product(s) coming from raw material impurities, from the process or as adventitious contaminant cannot be excluded.

This declaration applies only to the composition of granules and may not be extended to end products obtained by any modification of the composition and/or processing conditions which could lead to improper use of granules.
